

My Social Story

You might have heard some rumors about schools closing because of Covid -19 which is also known as the Corona virus.

This could mean that Holy Family might have to shut for a while and that you will have to stay at home, this does not mean you are going to get the virus it is just a precaution to stop the spread.

You may also worry that you are missing out on your education, but you won't, because work will be put on to class charts for you to access from your home.

This might seem scary but if you and your family follow the directions and wash your hands frequently the spread of the virus will stop, and everything will go back to normal and the school will open again.

If you wash your hands with soap and warm water, you will be doing your part in stopping the spread of the virus and everyone will be so pleased with you.
