# Awakening Minds in Design Technology

D&T is a subject that has the power to transform; we aim to teach students about designing solutions that improve people's lives. Solutions which mean people are able to make better decisions, to work more effectively or comfortably, to fully understand the impact of products and product design on the world and its resources.

Achieving Dreams in Design Technology

Design technology is about designing the future. To prepare students for work within the full range of Design & Technology careers both locally and beyond. The skills fostered by Design and Technology are valuable preparation for careers in many other fields e.g. medicine, law and computer science.

Serving Others in Design Technology

Through our subject we look to actively develop skills, such as teamwork, project and time management which are consistently sought and valued by employers. We also teach students to develop skills and ideas in an environmentally aware manner and to be mindful that Design Technology is a subject that can serve others with relevant and life enhancing products for all sections of society.
