

Awakening Minds in Spanish

We aim to awaken minds by developing lifelong learners through inspiring a curiosity of places, languages and cultures, and communication. We encourage students to practise their learning and develop a cultural knowledge in authentic situations, by giving them the opportunity to travel to countries where the languages are used.

Achieving Dreams in Spanish

We encourage progress in the skills of communication, listening, understanding, resilience, to problem solve and think analytically. We equip students with the essential tools to be able to achieve their dreams and be successful in the world of work

Serving Others in Spanish

By learning another language in stimulating and inspiring ways, students learn how to communicate and interact with different cultures and countries. As well as learning about and celebrating the diversity of cultures, students develop their own global understanding and become citizens of the world, who are able to serve others.
