

Film Intent

Awakening Minds

We aim for you to experience the powerful medium of film, which inspires a range of responses from the emotional to the reflective as you are drawn into characters, their narratives and the issues films raise. The root of that power is the immersive audio-visual experience that film offers – one which can exploit striking cinematography, composition and locations as well as powerful music and sound.

Achieving Dreams

The critical skills you develop through studying film will also be of use in GCSE English and modern foreign languages. The deepening historical and cultural perspectives you will develop will inform your work in history, geography, sociology and other humanities subjects

Serving Others

In lessons you will work with one another to understand the complexity of the human condition in a range of settings. This will enable you to understand the world more fully so that you can contribute to building a better society
